

	Week of 11/7	Week of 11/14	Week of 11/21	Week of 11/28	12/5-12/7
Control servo using an arduino					
Program the arduino to accept inputs from the fpga					
build circuit to connect the arduino to the fpga electronicly					
Use quartus's pi for ps2 keyboards to connect fpga					
program fpga to diplay values and record inputs from keyboard					
use spi to interface with arduino					
connect components together and test final design					
organize for repository					
prepare demo					
prepare project report
